

Abdominoplasty

Breast Augmentation @ 7 weeks

NON-INVASIVE SKIN CLOSURE - ALTERNATIVE TO SUTURES, STAPLES & GLUES

DermaCLIP® enhances skin closure by closing incisions quickly and *shortening closure times up to 83%*,¹ while still *creating tension-free skin edge eversion*. The device can also be used for temporary or final closure, as the device doesn't damage the skin. Easy to learn, quick to apply, and effective in use, the DermaCLIP® device is optimizing skin closure.

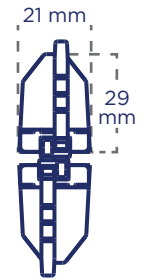

2 CLIP SIZES

2 LENGTHS
(1" & 3")

STACKABLE &
COMBINABLE

REGULAR CLIP

LARGE CLIP

79-year-old, Anticoagulated | Skin Flap, Bleeding for 24 Hours | Closed @ Home Visit

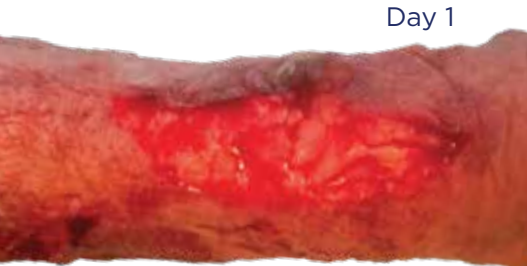

Day 0

7 weeks

5 mo.

Day 1

6 weeks

5 mo.

84-Year-Old | Traumatic Arm Laceration | Closed @ Home Visit

DermaCLIP® has been used on all types of wounds and incisions in all different environments, from field to ER to OR

1. Data on File.

**No Needles,
No Punctures,
No Mess**

QUICK & EASY

Easier than sutures, **faster** than glues with **less mess**
Eliminates needles & possibly anesthetic
Reduces closure time by up to 83%¹

VERSATILE

Usable on **most skin types**
Works on **curved wounds** & those with **tension**

PATIENT SATISFACTION

Patients reported **reduced pain & trauma of closure**
Easy to remove, no follow up visit required

ENHANCED CLINICAL RESULTS

Maintains **wound approximation & effects eversion**
Repeatable results, faster closure, limited exposure
Increase throughput, see more patients, reduce crowding

EVERSION

Tension-Free Eversion
"The Gold Standard"

- + Reduces wound-edge tension
- + Increases hemostasis
- + Increases perfusion

= **Better Cosmetic Outcomes**

Place & Pull

**SIMPLER | SAFER
FASTER | CHEAPER**

Save Time & Money. www.DermaClip.com

1. Data on File. 2. Glues only indicated for wounds under 5 cm (2") without subcuticular support.

Time Savings = ↑ Throughput & ↓ Cost
