

A NON-INVASIVE SKIN CLOSURE FOR MINOR WOUNDS & LACERATIONS¹

DermaQuik™ is a needle-free, easy-to-use skin closure that allows you to avoid a visit to the Emergency Room for the hospital-quality repair of cuts and lacerations up to 2 inches. The DermaQuik device brings this innovative technology previously available only to medical professionals to you - without a prescription. DermaQuik is a real wound closure device you can apply yourself at home, at work, and in the outdoors.

Each DermaQuik device is 1" wide and can be closed with just one hand, allowing self-treatment wherever and whenever you need it. The patented design allows you to create good wound closure every time.

DermaQuik is available in two adhesive options that cater to where you'll need it most.

HOME & FIELD

- For around the house, office or wherever you keep a first aid kit.
- Utilizes a gentle, long-lasting adhesive that works on most skin types.

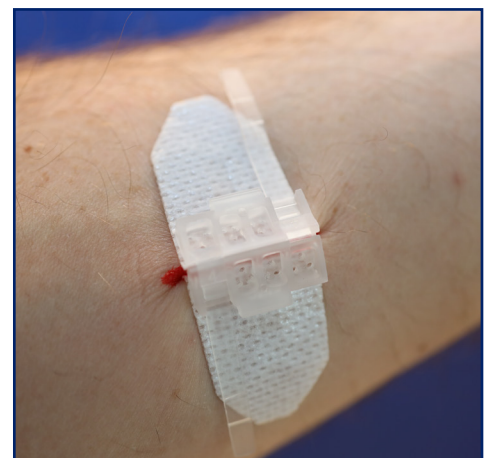

SPORT & EXTREME

- For the athlete, hunter, fisherman, hiker, sports enthusiast, or similar.
- Utilizes a more aggressive adhesive intended to adhere in harsh conditions.

Purchase just the clips or a re-closeable Kit. Each Kit contains alcohol swabs, sterile gauze pads, sterile dressings and 2 DermaQuik devices. Each device is perfect for a wound up to 1" or, placed together, up to a 2" wound.
